Summary

Product designer currently at Miro, helping ship features to 100M+ users. AI-native and comfortable moving fast with vibe coding, AI prototyping, and design-to-code workflows, while staying grounded in research, craft, and thoughtful product design.

Experience

Junior Product Designer

Miro

August 2025–Present

Amsterdam, Netherlands

- Led the visual and UX identity for Miro AI Presence, launched at Canvas 2025.
- Worked with the Tables team on AI-assisted workflows for a product at 433K MAU (+40% YoY), adopted by 100% of Miro's top 50 ARR accounts (\$83M ARR), with 87% of recurring users retained at 6 months.
- Contributed to MCP-powered Tables experiences that generated 700K+ tool calls over 90 days.
- Co-led an external client project tied to a \$4.7M portfolio deal, focused on increasing product usage and adoption.
- Designed for both end-user and admin surfaces to reduce friction in AI tool adoption, helping increase ARR by \$250K.

Associate Product Designer

Tails.com

March 2025–July 2025

London, UK

- Increased user retention by 30% by redesigning the food delivery experience across iOS, Android, and web, with a focus on the post-purchase dashboard.
- Audited and removed dark patterns, replacing them with clearer, more transparent flows.
- Led 20+ user interviews and turned findings into simpler dashboard features that made ordering easier.
- Designed end-to-end flows for food delivery and user profiles across platforms.

Product Design Intern

Wise

June 2024–August 2024

London, United Kingdom

- Redesigned the acceptable use policies experience, increasing engagement by 65%.
- Used research insights to improve task completion.
- Worked with PMs, content designers, and engineers to ship the work.

UX/Product Designer

Wolffkraft® Design Studio

December 2022–June 2023

Bangalore, India

- Owned product design from research and ideation through wireframes, prototypes, testing, and handoff.
- Used agile methods and user feedback to increase client satisfaction by 20%.
- Increased client engagement by 30% through product strategy grounded in user feedback.

UX/Product Designer

Userfacet

June 2022–November 2022

Bangalore, India

- Improved usability and accessibility, raising customer satisfaction by 10%.
- Ran user research and usability testing to find and fix pain points.
- Designed responsive feedback forms that raised customer satisfaction scores by 30%.

Education

MSc Human Computer Interaction Design

City, University of London

September 2023 – February 2024

London, United Kingdom

BA (hons) Communication Design

Indian Institute of Art and Design

August 2018 – May 2022

New Delhi, India
